

National Environmental Monitoring Sites Register

A consolidated view of
Australia's environmental
monitoring sites

www.neii.gov.au/nemsr

About the NEMSR

The National Environmental Monitoring Sites Register (NEMSR) provides a consolidated view of Australia's high-quality environmental monitoring sites.

Networks available in the NEMSR include seismic monitoring stations, Acoustic Pressure, ACORN-SAT Surface Air Temperature, Water Data Online, Ground Cover Reference Sites OzFlux Australian Supersites Network, Deep Water Moorings, National Mooring Network, Ocean Radars, Wireless Sensor Networks, Rainfall Radars, Macroinvertebrate Monitoring Network Phytoplankton Monitoring Network, National Reference Stations, Acidification Moorings Acoustic Observatories, Fish Survey Networks and many more.

Australian Government

How can I use the NEMSR?

The service can be accessed in two ways:

1. **Data viewer** – an interactive mapping tool
www.neii.gov.au/viewer.
2. **NEMSR API** - registered networks and their web service endpoints
<http://www.neii.gov.au/nemsr/using>

Contribute to the NEMSR

Additional monitoring sites can be registered in the NEMSR by contacting: environment@bom.gov.au.

Guidelines for preparing data using the NEMSR information model and data exchange format are available at: www.neii.gov.au/nemsr/data-providers.
